

Joey Kokinda

AI Engineer | Agents & Automation

610-701-1998 | j@kokinda.com | jkok.dev | github.com/joeykokinda | linkedin.com/in/jkokinda

EXPERIENCE

AI Growth Intern

May 2026 – Jul 2026

10x (10x.so)

Remote

- Built a horizontally scalable AI ad pipeline that parallelized per-avatar generation of TikTok/Instagram slideshows and videos using Seedance 2.0, Claude for creative direction, and ffmpeg assembly
- Built a one-click creative adaptation workflow that analyzes high-performing competitor ad formats and generates brand-aligned variants for paid social campaigns

Co-Founder

Jul 2025 – Present

Turtosa (turtosa.com) | AI Product Studio

Remote

- Co-founded an AI product studio and shipped production apps spanning content automation, agent workflows, and crypto infrastructure; developed Creou, an AI UGC generation platform
- Built full-stack platforms (Next.js + Node.js) integrating Claude, OpenAI, and Gemini behind unified APIs with usage limits and role-based access

Hardware Lead & Developer

Sep 2024 – Present

Boiler Blockchain — Purdue University

West Lafayette, IN

- Run and maintain club RPC infrastructure on a personal Ethereum node, giving developers a private, zero-rate-limit Web3 endpoint
- Represented the club at ETHDenver 2025 and helped raise \$15,000+ in sponsorships across a 500+ member community; built and maintain boilerblockchain.org

PROJECTS

Veridex | Hedera HCS, Node.js, Next.js, Solidity, AI Agents — 3rd Place, Hedera Hello Future Apex 2026

2026

- Pre-execution security middleware for AI agents: every action is gated and written to Hedera HCS with an AES-256-GCM encrypted, replayable audit trail before it runs
- On-chain trust scores derived from action history, operator-defined policies, and ERC-7715 wallet-scoped permissions for agent operators

Creou | Next.js, Supabase, Python, Claude, GPT-Image-2, Gemini

2026

- AI UGC platform that turns a chosen niche into editable, TikTok-native slideshow campaigns; a self-hosted Python worker orchestrates Claude, GPT-Image-2, and Gemini for content planning, image generation, and scheduled publishing

OmenSwap | Go, MCP, React, Foundry, AI Agents

2026

- Non-custodial multi-chain swaps (ETH, BTC, XMR, SOL, USDC, USDT) with no accounts or custody; one Go backend behind five interfaces including a native MCP server that lets AI agents swap on-chain

Jaeger | Chrome Extension, React, Polymarket, Base — 1st Place, Midwest Blockchain Conference 2025

2025

- Chrome extension that auto-discovers relevant Polymarket prediction markets for any page via keyword matching, with Base smart-account integration

TECHNICAL SKILLS

Languages: TypeScript, Python, Go, Rust, Solidity, C

AI & Agents: LLM orchestration (Claude, OpenAI, Gemini), multi-agent systems, MCP servers

Backend & Infra: Node.js, Next.js, Docker, PostgreSQL, Supabase, Cloudflare

Web3: Hedera HCS, Solana/Anchor, EVM/Solidity, ERC-7715, Foundry

EDUCATION

Purdue University

West Lafayette, IN

B.S. Artificial Intelligence

Expected May 2027

- Boiler Blockchain (Dev Team), Purdue Hackers, ML@Purdue

Rochester Institute of Technology

Rochester, NY

B.S. Robotics (transferred to Purdue)

2023 – 2024
