

# JOE KOKINDA

AI Engineer | Agents & Automation

j@kokinda.com · jkokinda.com · 610-701-1998

## SUMMARY

Purdue AI undergraduate (B.A., expected May 2027) and applied AI engineer shipping production agents, LLM automation pipelines, and crypto infrastructure, hackathon solo and team wins.

- LLM pipelines: multi-model orchestration (Claude, Gemini, OpenAI) for content and ads at scale
- Autonomous agents: MCP servers, pre-execution security, on-chain reputation
- Full-stack and infra: Go, TypeScript, Python; self-hosted nodes and production deploys
- Web3 engineering: EVM and Solana programs, non-custodial swaps, BTC/XMR node ops

## EXPERIENCE

### AI Developer

May 2026 – Jul 2026

*10x (10x.so) | AI Studio*

*Remote*

- Built an AI ad pipeline generating TikTok and Instagram video and slideshow ads in parallel, using Gemini for source analysis, Claude for creative direction, Seedance 2.0, and ffmpeg
- Built a format-cloning workflow that turns a viral ad into a strict-JSON shot-by-shot blueprint, then regenerates it on-brand with the client's chosen avatar

### AI Co-Founder

Jul 2025 – Present

*Turtosa (turtosa.com) | AI Product Studio*

*Remote*

- Co-founded a three-person AI product studio where all three of us build together, shipping a suite of AI products from in-house models to SaaS platforms
- Work across the full stack alongside my co-founders: model training, backend and infrastructure, and production web apps

### Blockchain Hardware Lead & Developer

Sep 2024 – Present

*Boiler Blockchain | Purdue University*

*West Lafayette, IN*

- Run the club's RPC infrastructure on a self-hosted BTC and XMR nodes.
- Represented the club at ETHDenver 2025 and 2026, raised over \$40,000+ in sponsorships across a 500+ member community; built and maintain boilerblockchain.org; Admin of the discord server

## PROJECTS

**Creou** | *Next.js, Supabase, Python, Claude, GPT-Image-2, Gemini*

2026

- AI content platform that turns a chosen niche into editable, on-brand TikTok slideshow campaigns end to end, from planning through scheduled multi-account publishing
- Self-hosted Python worker orchestrates Claude for content planning and GPT-Image-2 and Gemini for image generation, stitching it all together to final product

**Veridex** | *Hedera HCS, Node.js, Next.js, Solidity, AI Agents* | 3rd Place, Hedera Hello Future: Apex

2026

- Security middleware that checks each AI agent action before it runs and writes it to Hedera HCS as an encrypted, tamper-proof audit log
- Computes escrow-weighted, on-chain reputation scores using ERC-7715 wallet-scoped permissions, so agents can vet each other before accepting a job

**Pyras** | *Bitcoin, Monero, Cloudflare Pages, Linux, Self-Hosted Nodes*

2026

- Run self-hosted Bitcoin Core and Monero nodes behind a public block explorer at pyras.org, with a credential-isolating Cloudflare Pages API that injects node auth server-side so no credentials reach the browser

## AWARDS

**1st Place**, Polymarket Bounty | Midwest Blockchain Conference Hackathon (*Jaeger*)

2025

**3rd Place**, AI Agent Bounty | Hedera Hello Future: Apex (*Veridex*)

2026

**Eagle Scout**, Boy Scouts of America

2019

## TECHNICAL SKILLS

**AI & Agents:** LLM orchestration (Claude, OpenAI, Gemini), multi-agent systems, MCP servers

**Languages:** Go, TypeScript, Python, Rust, Solidity, C

**Infra & Web3:** Docker, PostgreSQL, Supabase, Next.js, Cloudflare, Linux, ffmpeg; Hedera HCS, EVM/Foundry, Solana, BTC/XMR nodes

## EDUCATION

**Purdue University**

West Lafayette, IN

*B.A. Artificial Intelligence | Boiler Blockchain, Purdue Hackers, ML@Purdue*

*Expected May 2027*

**Rochester Institute of Technology**

Rochester, NY

*B.S. Robotics (transferred to Purdue)*

*2023 – 2024*
