

Joey Kokinda

AI Engineer | Agents & Automation

610-701-1998 | j@kokinda.com | jkok.dev | github.com/joeykokinda | linkedin.com/in/jkokinda

EXPERIENCE

AI Growth Intern

May 2026 – Jul 2026

10x (10x.so) | AI Studio

Remote

- Built an AI ad pipeline that generated TikTok and Instagram slideshows and videos in parallel using Seedance 2.0, Claude for creative direction, and ffmpeg for assembly
- Built a workflow that analyzes top-performing competitor ad formats and generates on-brand variants for paid social campaigns

Co-Founder

Jul 2025 – Present

Turtosa (turtosa.com) | AI Product Studio

Remote

- Co-founded an AI product studio and shipped production apps for agent workflows, content automation, and crypto infrastructure
- Built full-stack platforms (Next.js + Node.js) that integrate Claude, OpenAI, and Gemini behind a single API with usage limits and role-based access

Hardware Lead & Developer

Sep 2024 – Present

Boiler Blockchain | Purdue University

West Lafayette, IN

- Run and maintain the club's RPC infrastructure on a self-hosted Ethereum node, giving developers a private Web3 endpoint that has served 24.9M+ requests
- Represented the club at ETHDenver 2025 and helped raise \$15,000+ in sponsorships across a 500+ member community; built and maintain boilerblockchain.org

PROJECTS

Veridex | Hedera HCS, Node.js, Next.js, Solidity, AI Agents | 3rd Place, Hedera Hello Future Apex 2026

2026

- Security middleware that checks each AI agent action before it runs and writes it to Hedera HCS as an AES-256-GCM encrypted audit log
- Computed on-chain trust scores from action history and operator-defined policies using ERC-7715 wallet-scoped permissions; tracked 17 agents and 3,900+ logged actions

Pyras | Bitcoin, Monero, Linux, Self-Hosted RPC Infrastructure

2026

- Run public Bitcoin and Monero RPC nodes (pyras.org) with a live dashboard showing sync status and uptime, giving developers free access to both chains
- Set up and maintain the full node stack, including the server, chain sync, and the status API behind the dashboard

Creou | Next.js, Supabase, Python, Claude, GPT-Image-2, Gemini

2026

- AI content platform that turns a chosen niche into editable TikTok slideshow campaigns; a self-hosted Python worker uses Claude, GPT-Image-2, and Gemini for content planning, image generation, and scheduled publishing

Jaeger | Chrome Extension, React, Polymarket, Base | 1st Place, Midwest Blockchain Conference 2025

2025

- Chrome extension that finds relevant Polymarket prediction markets for any page using keyword matching, with Base smart-account integration for in-page trading

TECHNICAL SKILLS

Languages: TypeScript, Python, Go, Rust, Solidity, C

AI & Agents: LLM orchestration (Claude, OpenAI, Gemini), multi-agent systems, MCP servers

Backend & Infra: Node.js, Next.js, Docker, PostgreSQL, Supabase, Cloudflare, Linux self-hosting, ffmpeg

Web3: Hedera HCS, Solana/Anchor, EVM/Solidity, ERC-7715, Foundry, BTC/XMR node operations

EDUCATION

Purdue University

West Lafayette, IN

B.S. Artificial Intelligence

Expected May 2027

- Boiler Blockchain (Dev Team), Purdue Hackers, ML@Purdue

Rochester Institute of Technology

Rochester, NY

B.S. Robotics (transferred to Purdue)

2023 – 2024
